PROFESSIONAL SUMMARY

Results-driven Software Engineer and Blockchain Developer with a BSc in Software Engineering from Makerere University, Class of 2024. 3+ years building and deploying secure, scalable systems for fintech and logistics clients. Creator of MereExpress, a multi-tenant food delivery marketplace with live tracking, PostGIS, and Mobile Money integration. Also built Tamper-Proof CMS v2 using Blockchain audit trails for 100% data integrity. Technical expertise in Solidity, Smart Contracts, React, Next.js, TypeScript, Node.js, Python, FastAPI, Postgres + PostGIS, Docker, REST APIs, Git/GitHub, and Multi-tenant RBAC/RLS. 4x Funded Prop Trader with \$40K+ verified capital, demonstrating discipline and risk management. Seeking a Graduate Volunteer placement under the National Apprenticeship Programme to contribute to MGLSD or partner ICT/Digital Innovation teams while gaining enterprise-level experience.

CORE SKILLS

Development: Solidity | Smart Contracts | Web3.js | React | Next.js | TypeScript | Node.js | Python | FastAPI | Postgres + PostGIS | Docker | Redis | WebSockets | REST API | Git/GitHub

Blockchain/Infra: Multi-chain Indexing | Immutable Logging | RLS + RBAC | Multi-tenancy | Smart Contract Security

Tools: Microsoft Office | Google Workspace | Zoom | Teams | VS Code | Postman

Soft Skills: Team Leadership | Documentation | Process Optimization | Communication | Accountability

KEY PROJECTS

[MereExpress](#) | 2026 | Solo

Next.js, FastAPI, Postgres + PostGIS, Docker, WebSockets

- Multi-tenant food delivery marketplace for Kampala
- Features: 3km radius search, GPS pin + live rider tracking, split bill Momo/Airtel requests, 9pm Smart Deals
- Multi-tenant RLS + RBAC, PWA offline cache, PostGIS geospatial queries, Redis +

RQ jobs

[Tamper-Proof CMS v2](#) | 2025 | Solo

JavaScript, Solidity, Web3.js

- Criminal & data management system with blockchain audit trails and immutable logging
- Designed for institutions that need 100% data integrity and tamper-proof records

[Cosmos Wallet Checker](#) | 2025 | Solo

React, TypeScript, REST APIs

- Multi-chain Cosmos L1 explorer. Queries balances, delegations, rewards via public REST
- Built phone-only to prove auditable, keyless infra skills for tokenization and on-chain data

XAUUSD Discipline | 2025 | Solo

Python, MT5, MyFXBook API

- Rule-based system enforcing 1.5% risk per trade + \$3k daily loss limit
- Supply/Demand + SMA/RSI confluence on H1. 60-day journal automation
- [MyFXBook](#) verified performance tracking

EDUCATION

BSc Software Engineering | Makerere University, CoCIS | 2019 - 2024

Final Year Project: Tamper-Proof Criminal Management System using Blockchain

TOOLS

Blockchain: Solidity, Web3.js, Truffle/Hardhat, MetaMask, Smart Contract Security

Dev: Python, FastAPI, Next.js, React, TypeScript, Node.js, Postgres, PostGIS, Docker, Redis, Git/GitHub, REST API, VS Code

Trading: MT5 | MyFXBook | Risk Calculators
